

# New Year, New Slime

## Ingredients

1/4 tsp Borax Powder

1/2 cup Elmer's Clear Washable PVA School Glue

1 cup of Water divided into 1/2 cups

Glitter, Confetti, Food Coloring (optional)

## Directions

1. Add your glue and water to a bowl and grab a mixing utensil.
2. Mix in food coloring, glitter, and confetti as desired. Add the sparkle and shine with glitter and confetti.
3. Mix 1/4 tsp of borax powder into a 1/2 cup of warm water to make your slime activator solution.
4. Pour the borax/water solution into the glue and water mixture and stir well. You will see it come together right away. It will seem stringy and clumpy, but that's okay!
5. Remove your slime from the bowl and spend a few minutes kneading the mixture together.

Tip: If your slime is too sticky add a few more drops of the borax solution.
